LC8992

PAL CCD 1H Delay Line

Overview

The LC 8992 is a 1H delay line for PAL television systems. It incorporates a 565.5 stage CCD shift register, timing generator, clock driver, sync clamp and auto-bias circuits, and a sample-and-hold amplifier. Only an external low-pass filter is required to implement a 1H delay line. The LC8992 operates with a single 9V power supply and is available in 8-pin plastic DIPs.

Features

- 1H delay with low-pass filter and 8.86MHz clock.
- Minimum of external components.
- Low clock input voltage.
- Single 9V power supply.
- 8-pin DIP
